Ransomware, WFH, GDPR, CaCPA ISO, Cobit, HIPAA, and SOX Addressed

This audit program contains a list of tasks and and weights assigned to each task. The Excel sheet calculates the value of both positive and negative points. Based on the audit you place an "X" in the yes and/or no box and a value is automatically calculated. When the audit, which is on the worksheet 'Audit Program', is completed all of the results are them posted on the summary worksheet and graphic charts can be generated from those tables (see the attached sample).

The worksheets Audit Program Summary, Audit Program, and Audit Program Graphic are integrated - if you change the name on the on any of those three worksheets then the Audit Program Summary Sheet and Audit Program Graphic will not be generated correctly. We suggest that you make a copy of the entire excel file and delete the "Sample" worksheets.

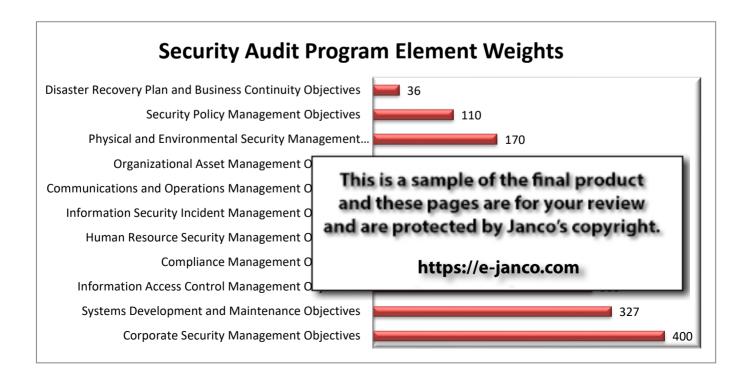

We have assigned weights to each element of the audit, you are free to updated to weights to what you think they should be. We assume no liability for the weight assignment and leave that up to the user. Our weights are only recommendations and should be considered as such.

The last three worksheets show a sample of the forms filled out with a set of summary graphic We assume that the individual completing the form is knowledgeable in the use of Excel spreadsheets. Included with the excel spread sheet are a PDF version of the audit program that can be duplicated and used in the process. For ease you can fill out the survey manually and then transfer the data to the excel worksheet.

NOTE: An item can be marked both as a yes and a no, in which case it will impact both the positive and negative score.

This audit program is not to be re-sold or redistributed without the expressed WRITTEN permission of Janco Associates, Inc.
